# Animals Around the Clock

Not all animals are awake during the day. Some don't come out of their "beds" until dark. Who's awake when you are? Who's not?

Read the time in each picture. Then cut out the clocks. Paste each clock onto the correct picture.

**7:00 in the morning**  
This firefly was on the "glow" last night. Now it's time for a nap!

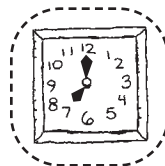

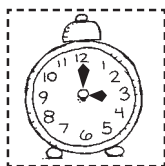

**10:00 in the morning**  
While you're at school, bats are sound asleep.

**3:00 in the afternoon**  
During the heat of the day, this leopard snoozes away!

**8:00 at night**  
It's bedtime for you! But for this skunk family, it's breakfast time!

**Do not disturb animals snoozing during the day. They may have had a busy night!**
