

Name _____

Ants Eat Plants!

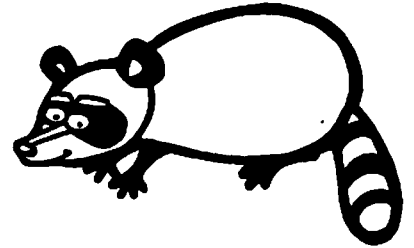

Just as pets and people need the right kind of food, so do wild animals. Draw the food that each ani-

mal needs. Use the sentences to guide you.

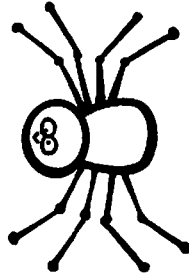

Birds eat seeds and worms.

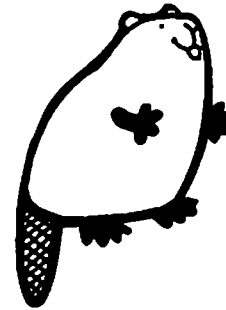

Raccoons eat berries, acorns, and fish.

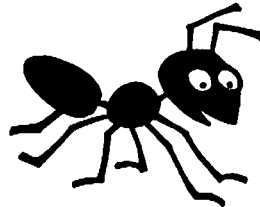

Spiders eat bugs.

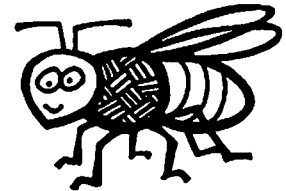

Beavers chew on twigs and branches.

Ants eat leaves.

Bees get their food from flowers.

Give wildlife a break. Don't squish bugs, pick flowers, or break tree branches. Remember, wild animals need those things!

What do you like to eat? Draw two of your favorite fruits and vegetables on the back of this paper. Then color them in!
